| 9.00 - 9.30 am | Evaluation & Management of Pulmonary Hypertension | Dr. Deborah Levine  
University of Texas San Antonio - USA                        |
| 9.30 - 10.00 am | Pulmonary Vasodilators in India - Need to draw the line | Dr. Ruchit Shah                                                |
| 10.00 - 10.30 am | Pulmonary Embolism - The Thrombolysis Dilemma | Dr. Nimit Shah                                                      |
| 10.30 - 11.00 am | Imaging in Pulmonary Embolism | Dr. Himanshu Choudhary                                               |
| 11.00 - 11.15 am | TEA BREAK                    |                                                                         |
| 11.15 – 11.45 pm | Molecular Diagnostics in 2018 | Dr. Geeta Natarajan                                                  |
| 11.45 - 12.15 pm | Design a Regimen for DRTB - Combining Guidelines & Real World | Dr. Amita Nene                                                      |
| 12.15 - 12.45 pm | “Therapeutic Drug Monitoring: An underutilized strategy in TB” | Dr. Mehlul Shah                                                   |
| 12.45 - 1.15 pm | Role of Surgery in MDR TB    | Dr. Amol Bhanushali                                                   |
| 1.15 - 1.45 pm | LUNCH BREAK                  |                                                                         |
| 1.45 - 2.15 pm | Lung Cancer Staging - Impact on Treatment | Dr. M.M.Basade                                                      |
| 2.15 - 2.45 pm | Robotic Lung Surgery          | Dr. Kamran Khan                                                        |
| 2.45 - 3.15 pm | Advances in Lung Cancer Chemotherapy | Dr. Sujata Vasani                                                  |
| 3.15 - 3.45 pm | Nuclear Medicine Imaging in Lung Disease | Dr. Suman Jangra                                                     |
| 3.45 - 4.00 pm | Valedictory Function & Prize Distribution Function followed by High Tea |                                                                         |
Pulmonary disease mostly develops as a combination of abnormalities in different components of the lung including the airway, airspace, interstitium and blood vessels causing a large variety of ailments both acute and chronic. Studies have shown that reduced lung function is also one of the major risk factors for cardiovascular disease including Myocardial Infarction, Heart Failure and Sudden Death.

Patients suffering from COPD develop adverse consequences which affect their quality of life and is aggravated due to repeated exacerbations and hospitalizations leading to premature mortality. 30 – 50% of COPD deaths are due to underlying Cardiovascular Disease.

In our country we face the immense challenge of identifying and treating Pulmonary Tuberculosis which is the world’s deadliest disease and is spreading like wild fire. The spread of TB is largely due to unhealthy living conditions, malnutrition, increasing numbers of TB patient’s are also immunocompromised.

Ending this deadly disease requires maintaining and strengthening diagnostic practices and increasing efforts to identify and treat latent TB.

Extremely drug resistant TB represents a major threat to Global TB control and is currently estimated to be approximately 6.2% of all MDR TB cases.

In 2017, 10 million new patients were infected with Tuberculosis and 1.3 million patients died due to TB worldwide.

The regulatory role of TB cell has opened the door for maintaining a balance between immunology and destructive disease pathophysiological which makes it an important opportunity for future research.

ARDS occurs in critically ill patients and etiologically we see more patients in the mild category in India. “Lung Safe” observational studies assessed the data from 451 Intensive Care Units worldwide which identified that 2,813 patients were meeting the criteria for ARDS.

The American Association Of Chest Physicians has listed Lung Cancer as the leading cause of cancer world wide. A majority of the patients are diagnosed with incurable disease due to delay in seeking treatment and other coexisting factors.

With this highly focused menu of topics at this International Conference on diseases of the Lung we are confident that the delegates will benefit by gaining knowledge from experts in Pulmonology & Critical Care.

On behalf of Saifee Hospital I would like to compliment the team consisting of our young Pulmonologists Dr. Unmil & Dr. Mehul Shah under the able leadership of Dr. A. R. Undre for their untiring efforts in making this conference a success.

Dr. R.D. Lele

Dr. Ashok Mahashur

Dr. Amita Athawale

Dr. Apar Jindal -Chennai

Dr. Aashit Hegde

Dr. Amita Nene

Dr. Amol Bhanshali

Dr. Bhavin Jankharia

Dr. Deepeesh Agarwal

Dr. Geeta Natarajan

Dr. Himanshu Choudhary

Dr. Jyotsana Joshi

Dr. Kumar Doshi

Dr. Kamran Khan

Dr. Mehul Shah

Dr. M. M. Basade

Dr. Muheen Shaikh

Dr. Nitin Abhyankar

Dr. Nimit Shah

Dr. Prashant Chhajed

Dr. Prahlad Prabhudesai

Prof. Dr. R. D. Lele

Dr. Ravindra Mehta

Dr. Rajeev Mehta

Dr. Rajesh Sharma

Dr. Ruchit Shah

Dr. Sujeet Rajan

Dr. Sujata Vasani

Dr. Suman Jangra

Dr. Unmil Shah

DAY 1 - 14TH DECEMBER 2018

SESSION 1  Obstructive Airway Diseases

0.30 - 3.30 pm  Prof. Dr. R.D. Lele

Inauguration

3.30 - 4.00 pm  Dr. Rolando Berger

Management of Acute Severe Asthma

4.00 - 4.30 pm  Dr. Ashok Mahashur

Pharmacotherapy in Asthma - Focus on GINA Step 5

4.30 - 5.00 pm  Dr. Sujeeet Rajan

Current Management of COPD

5.00 - 5.30 pm  Dr. Amil Athawale

Allergic Bronchopulmonary Aspergillosis (ABPA)

5.30 - 5.45 pm  TEA BREAK

SESSION 2  Sleep Medicine

5.45 - 6.15 pm  Dr. Jyotsana Joshi

Diagnosis of OSA - Challenges and Pitfalls

5.15 - 6.45 pm  Dr. Prahlad Prabhudesai

Whats new in OSA management

5.45 pm onwards  Poster Presentation

DAY 2 - 15TH DECEMBER 2018

SESSION 1  Intertstitial Lung Diseases

9.00 - 09.30 am  Dr. Richard Morehead

Current Management of IPF

9.30 - 10.00 am  Dr. Ketan Buch

Hypersensitivity Pneumonitis

10.00 - 10.30 am  Dr. Kumar Doshi

Sarcoidosis – Challenges in Diagnosis & Management in India

10.30 - 11.00 am  Dr. Bhavin Jankharia

ILD patterns on CT - Practical approach

11.00 - 11.30 am  Dr. Pradeep Vaideshwar

Lung Pathology

11.30 - 11.45 am  TEA BREAK

SESSION 2  Interventional Pulmonology

11.45 - 12.15 pm  Dr. Unmil Shah

EBUS Tbna – The Standard Approach

12.15 - 12.45 pm  Dr. Nitin Abhyankar

Medical Thoracoscopy

12.45 - 1.15 pm  Dr. Prashant Chhajed

Management of Central Airway Obstruction

1.15 - 1.45 pm  Dr. Ravindra Mehta

Cryotherapeutics - Cold is the new Hot

1.45 - 2.15 pm  Dr. Rajeev Mehta

Approach to solitary pulmonary nodule

2.15 -2.45 pm  LUNCH BREAK
